# Balustrades

A self-supporting balustrade of optiwhite laminated glass mounted on glass adaptors

A self-supporting balustrade of optiwhite laminated glass mounted in a self-supporting profile

# Krosno Design glass doors in arrangements

Door made by using fusing glass technology

Fusing technology gives doors a unique character and three-dimensional effect

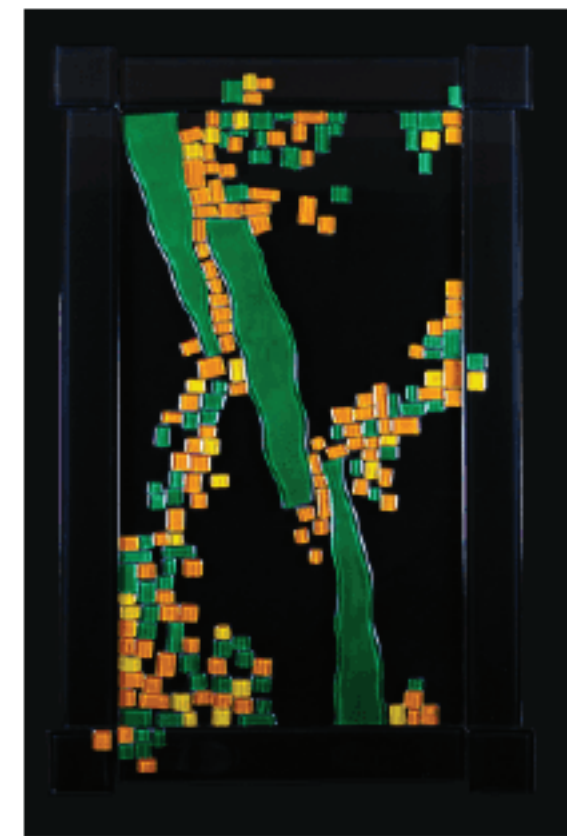

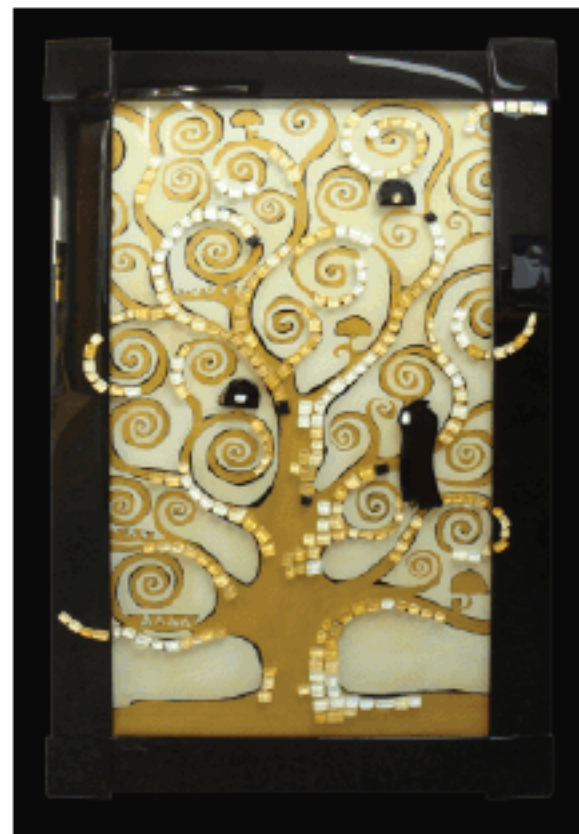

# Glass paintings

The artistic side of fused glass allows us to make any pattern on the glass. We present some selected paintings made so far for our customers.

Reproductions of paintings made by famous painters in glass versions are popular among our customers

# Glass sculptures

Investland has made a number of glass sculptures located in several iconic city sites for Krosno, the Glass City and the Glass Heritage Centre as part of the Glass Route.

A modern form of glass structures revitalises space of Krosno - the Glass City. It presents glass in an attractive and unexpected way as very universal and interesting means of artistic expression.

The Glass Route leads through the whole city, showing a lot of aspects of Krosno - the interesting centuries-old history, historical sites as well as the most important cultural and tourist attractions.

Individual sculptures refer in their form as well as content to the intangible heritage of Krosno - stories and legends.

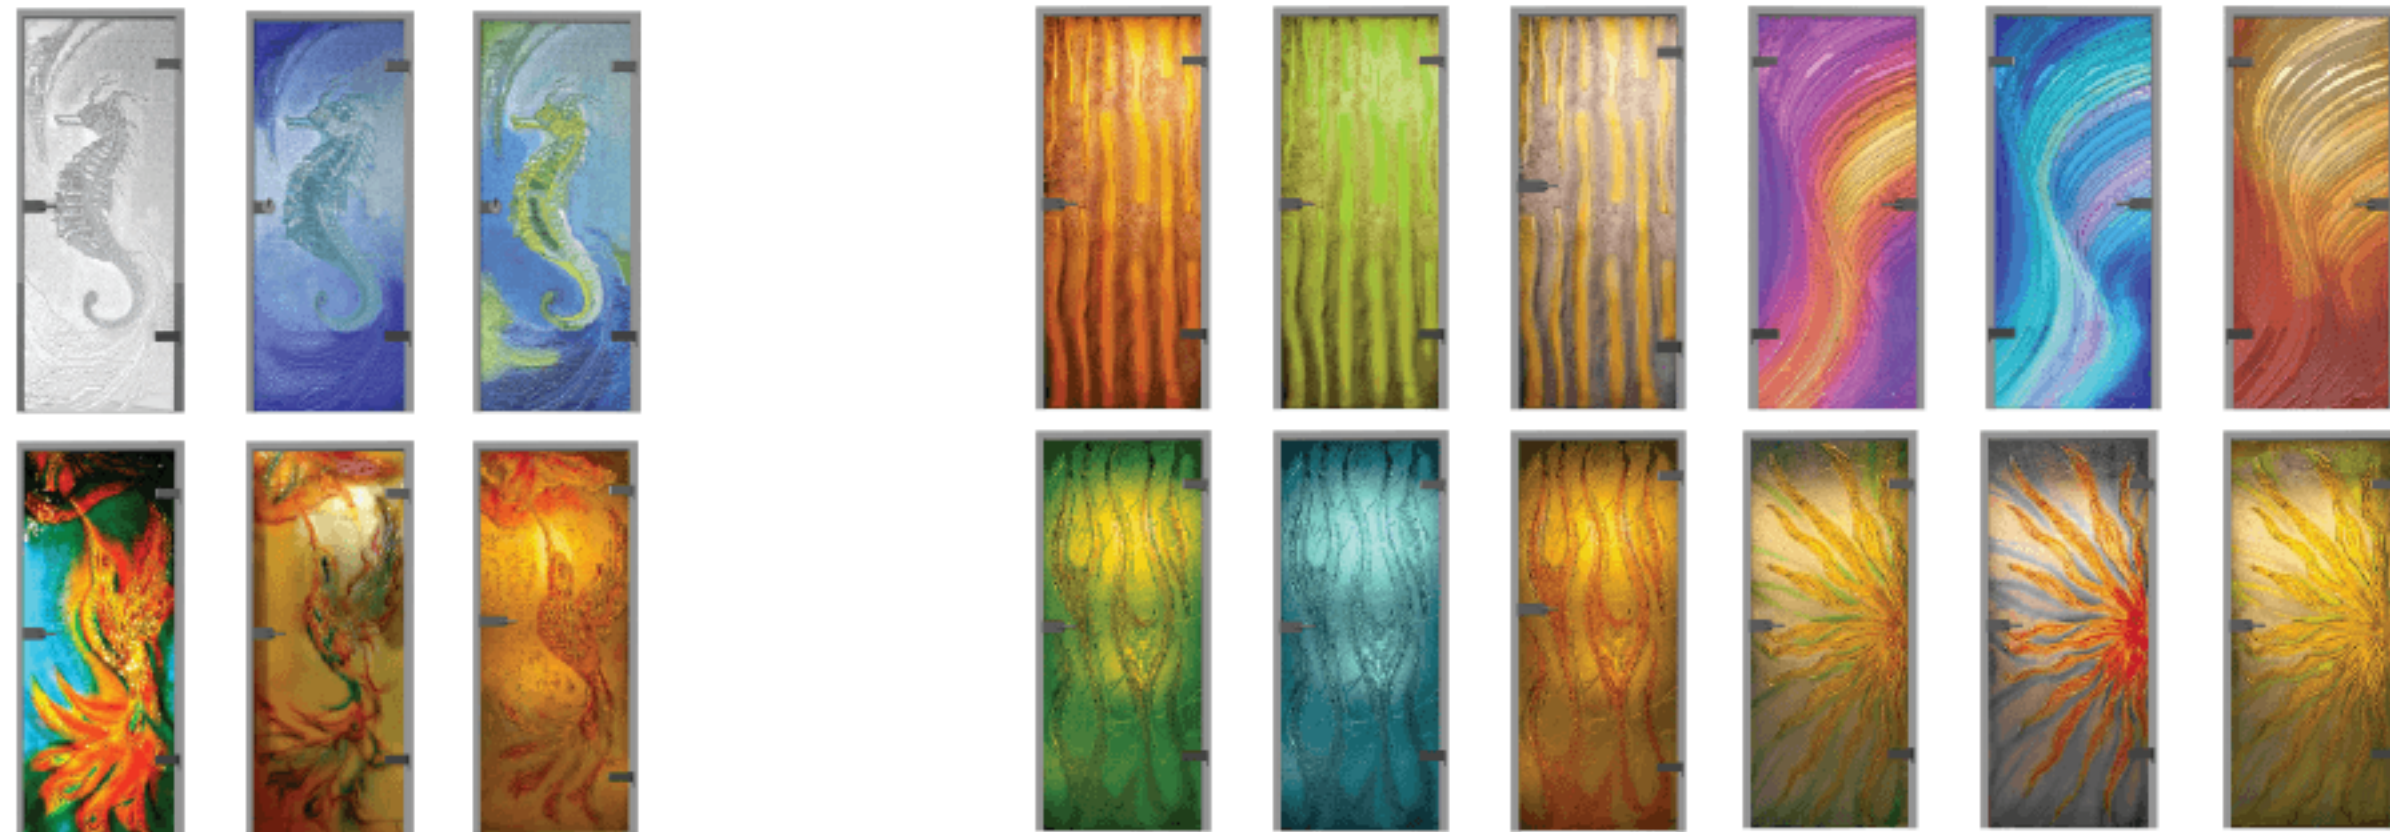

GLASSPOINT is the second brand for Investland Sp. z o.o. that offers their customers the possibility to buy unique glass doors of hand-made fused glass. These exceptionally aesthetic glass doors are available in 12 different patterns, every in 3 colour versions. Our glass doors will make your home unique. Thanks to a hand-made production we give an exceptional shape of a bas-relief combined with a palette of wonderful colours to every door.

We are sure of the quality of our products, therefore, we also offer you a favourable warranty. Our doors go through a hardening process thanks to which they are completely safe to use.

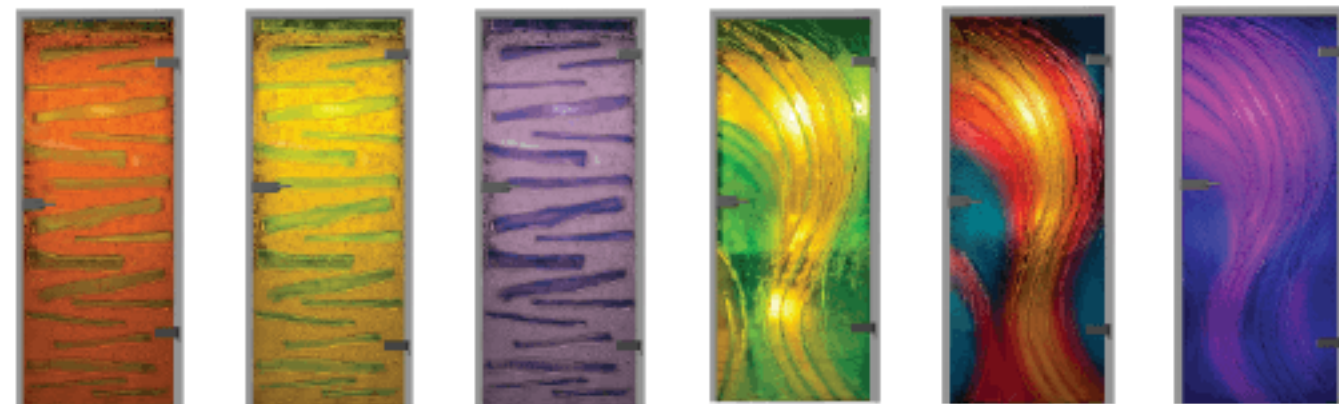

Available sizes:

- 717 x 2017 mm
- 817 x 2017 mm
- 917 x 2017 mm

dimensional tolerance  
is +/- 2mm

We offer hinges and door handles from reputable companies for standard door models.

The doors are prepared for installation in door frames.

The hinges are mounted on the left or right, depending on the customer's preference.

The relief may also, on your request, be placed on the outside or inside.

## Cooperation

Krosno Design invites architects and interior designers as well as other entities interested in selling or using our products in their own projects to cooperate with us.

We offer attractive and flexible conditions of cooperation, high discounts, favourable payment terms and a number of marketing and commercial tools.

We have prepared a special loyalty scheme for our partners.

Companies and individuals interested in the cooperation can contact our sales department and visit us in Krosno.

*Do you have your own vision of a product?  
Would you like to change the arrangement, style, relief or composition?  
That's easily done, contact us and we'll do an individual project for you.*
